100%

Input from federal and provincial regulatory agencies, findings from the Project's environmental and socio-economic assessment and best practices in Indigenous participation and monitoring were also considered in the development of this Plan.

In the draft Plan, Westcoast provides detailed information about the roles and responsibilities of Indigenous participants, along with their training and certification requirements, reporting methods and frequency, and contractor oversight.

Indigenous Project participation*

+265,000 hours

spent conducting environmental and cultural surveys

65%

of fieldwork hours completed by Indigenous vendors

+\$37 million

invested directly in Indigenous business for various Project-related work

*as of August 2025

Roles and responsibilities

- Indigenous monitors will be tasked to observe, document and report daily construction activities to ensure environmental and cultural values are protected and respected.
- Monitors will submit daily reports which will include the locations visited, their observations, and any questions, concerns or actions taken to address issues.
- Coordinators will manage the monitors and facilitate their daily field assignments, on-site transportation and contact with other construction personnel.
- Coordinators will also prepare the weekly and monthly reports that will be shared with Indigenous groups and Westcoast.

Monitors will be deployed based on construction schedules and areas of interest identified by their respective communities or traditional territory. Monitoring activities may vary depending on the identified interests and concerns of the community.

Training and certification

All participants will complete the training required and provided by Westcoast, including:

- Pipeline construction work and safety
- Wildlife safety
- Human trafficking awareness and prevention
- Codes of conduct, and the After Hours and Respect for Community policies

Program participation

Several Indigenous groups have expressed an interest in participating in the program. Westcoast intends to enter into monitoring agreements with each community that will be finalized before construction begins. Westcoast remains open to new participation requests.

Next steps

Plan development timeline

To finalize the Plan, Westcoast is requesting and compiling further input from Indigenous groups. Feedback is required by the end of 2025.

If the Project is approved, the finalized Plan will be submitted to the CER, which will include a summary of engagement and feedback received.

Post-construction monitoring may be refined based on lessons learned during Project construction. Further engagement will occur on post-construction monitoring requirements.

We request your feedback

Please help shape the Indigenous Monitoring Plan by responding to the following questions:

Are you aware of whether your community has an existing Indigenous community-based monitoring program? If yes, can you provide further details of what it is and how Westcoast can review the program?

Westcoast has received several Indigenous-led studies and assessments with site specific sensitive areas that should be prioritized for monitoring. What areas do you think should be prioritized? (e.g., wetlands/water courses, cultural sites, wildlife corridors)?

What are your views on the suggested roles and responsibilities of the monitors?

Is there any other technical training or cultural training we should consider? If yes, please provide details:

What details would you like to see in the monitoring reports?

How should we share the monitoring reports?
