Sunrise Expansion Program Providing safe accommodations to our workforce

Westcoast Energy Limited Partnership (Westcoast), an Enbridge affiliate, is proposing the Sunrise Expansion Program (Project), an expansion of the southern portion (or T-South) of the Westcoast pipeline system to meet demand for natural gas. This natural gas is used to heat homes, hospitals, businesses and schools. It's also used for electrical power generation and many manufacturing processes that produce hundreds of products that improve our lives.

The proposed expansion work includes the addition of pipeline loops, which are sections of the pipe added to the existing pipeline system to increase capacity. Near Mackenzie, two 42-inch diameter pipeline loops are planned: one running 18.1 km from Compressor Station 3 (CS-3) by McLeod Lake, to north of Trapper Creek Road; and the other running 13.5 km from south of McLeod Lake to north of Kerry Lake.

An additional compressor unit will also be needed at the existing Compressor Station 2B (CS-2B), northeast of Mackenzie, to help push the additional natural gas through the pipeline system.

If approved by the Canada Energy Regulator, construction is expected to begin in Q2 2026, with a target in service date of Q4 2028.

Temporary workforce accommodations

Ensuring the safety and well-being of both our workforce and the communities where we live and work is a top priority. To support this, Westcoast is proposing two temporary workforce accommodations near the Project sites, in the vicinity of Mackenzie to support the pipeline construction work, and in the Pine Pass near Powder King Resort to support CS-2B construction work. Locations are being determined in collaboration with local communities and Indigenous groups.

These temporary accommodations will support worker's safety and well-being by reducing their commute times to and from the Project sites.

They will also help minimize strain on local infrastructure and facilities, such as water, sewage, and medical facilities. These accommodations will have their own mobile medical units and may operate with an independent water and sewage system to lessen impact on nearby communities.

> Example of a temporary workforce accommodation that can house 700 workers.

	Pipeline looping construction accommodation	CS-2B construction accommodation
Proposed location	Near Mackenzie, BC	In the Pine Pass, BC (near Powder King Resort)
Land requirements	Approx. 22.5 acres	Approx. 10 acres
Set up	Q1 2027	Q1 2027
Peak occupancy	Q3 2027	Q3 2027
Demobilization	Majority in Q4 2027, potentially retaining a small portion of the accommodation for reclamation crews in summer 2028	Q4 2028
Number of workers during peak construction period	Up to 700	Up to 150

Working with the local communities

Westcoast is committed to working with local communities to plan for and address potential socio-economic effects of the Project. This Project is expected to boost local economies by hiring local workers and service providers. These workers will use local restaurants, stores, and other businesses in the area.

Employment opportunities will be provided through the Project's contractors, which will hire local workers, Indigenous peoples and businesses. Job availability, in areas such as security, catering, cleaning, and other essential services, will be made public once the workforce accommodation provider has been selected.

Safety in workforce accommodations and the community

At Westcoast, safety is a core value – both on the job and in the communities where we operate.

The workforce accommodations will be treated as an extension of our workplace, meaning all workers must adhere to Westcoast's policies, with respect to creating a safe and respectful environment for workers, visitors, and community members.

All our workers will be required to complete mandatory training in human trafficking prevention, workplace health and safety, and Indigenous cultural awareness.

Westcoast is engaging Indigenous groups and local communities in the development of a Community and Gender Safety plan for the Project. The feedback and lessons learned from communities will help Westcoast to develop strategies that support community safety during construction.

Codes of Conduct Policy

To maintain a safe and professional environment, all workforce housing residents must comply with Westcoast's Codes of Conduct, and After Hours and Respect for the Community policies, which includes:

Strict adherence to Westcoast's alcohol

Did you know?

All our workers will be required to complete mandatory training in:

- · Human rights protection
- Human trafficking prevention
- Workplace health and safety
- Cultural safety
- Indigenous cultural awareness
- Codes of Conduct Policy and After Hours Respect for Community Policies

Westcoast maintains zero tolerance for:

- · Alcohol and drug use
- Harassment, discrimination, or violence of any kind
- Any behaviour that negatively impacts a community

and drug free workplace policy

- Promoting a respectful harassment-free workplace
- Zero tolerance for violence, discrimination, sexual harassment or retaliation
- Completion of all mandatory training

Failing to follow any of these policies or undertaking any behavior that negatively impacts a community will result in disciplinary action.
